

Public					
Question	Very high	High	Medium	Low	Very low
How familiar are you with writing model transformations?	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
How familiar are you with ETL?	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
How familiar are you with eclipse?	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

Before using the tool			
Question	Trans1	Trans2	Trans3
Which transformations are faulty?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

After using the tool					
Question	Trans1		Trans2		Trans3
Which transformations are faulty?	<input checked="" type="checkbox"/>		<input type="checkbox"/>		<input checked="" type="checkbox"/>
Could you do all the steps of using the tool? (Yes/No) If No which steps?	Yes				
Question	Very high	High	Medium	Low	Very low
To what extent have you found the automatic mode of the tool to be helpful to detect faulty transformations?	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>
To what extent have you found the automatic mode of the tool to be helpful to detect correct transformations?	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>
How helpful is the interactive mode of the tool to detect errors?	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>
How much does the SEET tool save your time?	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>
How much does the interactive mode of the tool give you more control over the execution process?	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>
How user-friendly is the tool?	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>
How good is the appearance design of the tool?	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>
After right-clicking on an ETL file, how easy did you find the tool icon from a pop-up menu?	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
How easy is to use the tool?	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>
How learnable is the tool?	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
How is your satisfaction with the tool?	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>

Comment:

1. The name of PC and SMF for Trans1 should be PC_trans1 and SMF_trans1 correspondingly.
2. The manual checking of SMF is waste and the tool must check the correspondence of SMF and PC automatically.
3. By increasing the size of the transformation checking its code by the programmer become harder and the tool is needed to verify the transformation code. However, in the case that the size of the PC and

SMF is increased by the same ratio, it is not good that the programmer investigates the whole SMF manually.

4. For this case study, all cases are generated in the PC. If the cases are increased, I wonder whether what happens.
